LIFE ORIENTATION
SCHOOL BASED ASSESSMENT

TEACHER GUIDELINE
GRADE 12
2017
Dear Life Orientation Teachers

This SBA guideline is designed to assist you in making classroom practice more manageable. It is highly recommended that you follow the structure and suggestions set out in this guideline. This guideline uses as its source of reference all National and Provincial policy documents. This document will assist you in ensuring that you meet the policy requirements.

In order to facilitate the process of benchmarking, guidelines are given for each formal assessment task. It is strongly recommended that you make use of the exemplars and wherever the need arises to adapt it to suit contextual factors. If you follow the guidelines you can be assured of meeting the requirements as stipulated in policy.

In teaching Life Orientation, it is vital to ensure that the content is sufficiently unpacked to allow the learners to gain knowledge. Activities are meant to gain skills and should be preceded by the acquisition of knowledge.

The activities in the SBAs are aligned to the CAPS and timeframes are stipulated for their completion. Classroom practice should therefore be characterised by proper time management to ensure that ALL content is covered in the given time period and that SBAs are completed by the end of each term.

The provincial SBAs are COMPULSORY. All care has been taken to ensure that they are standardised and are of the requisite standard. Schools who wish to deviate from this arrangement should acquire written permission to develop their own SBAs and these must be submitted to the district and provincial office for moderation.

PET is a compulsory component in Life Orientation and no learner may be exempted from participation. It is only in unique circumstances (e.g. serious medical reasons) that schools may enquire from the provincial office on how to deal with a special case.

If there are unique problems that your school experiences, do not hesitate to seek help using the proper protocol channels. Remember that at all times the Gauteng Department of Education Life Orientation team is ready to assist in ensuring service delivery and meeting the needs of learners and teachers.

1. Introduction

1.1 School-Based Assessment

School-based assessment (SBA) is a form of assessment which is embedded in the teaching and learning process and is an integral part of learners’ preparation for the final examinations. It has a number of important characteristics which distinguishes it from other forms of assessment:

- It involves the teacher from the beginning to the end: from planning the assessment programme, to identifying and/or developing appropriate assessment tasks right through to making the assessment judgments.
- It allows for the collection of a number of samples of learner performance over a period of time.
- It can be adapted and modified by the teacher to match the teaching and learning goals of the particular class and learners being assessed.
- It is carried out in the classrooms and is conducted by the learners' own teacher.
- It takes place at different stages of the learning process, as required in Chapter 4 of the Curriculum and Assessment Policy Statement (CAPS).
- It involves learners more actively in the assessment process, especially if self and/or peer assessment is used in conjunction with teacher assessment.
- It allows the teacher to give immediate and constructive feedback to learners.
- It stimulates continuous evaluation and adjustment of the teaching and learning programme.
- It complements other forms of assessment, including external examinations.

1.1.1 The FIVE steps of quality School-Based Assessment

Step 1: Generating and collecting evidence of learners’ performance
This is done through the various assessment tasks given to learners by the teacher.

Step 2: Assessing learners’ performance
This is achieved when the teacher marks the learners’ responses using an appropriate assessment tool in order to arrive at a mark which indicates the learners’ understanding of the topic(s) covered by the assessment task.

Step 3: Recording learners’ performance
The teacher records the learners’ marks to track their progress throughout the year and also records specific challenges experienced by the learners in order to plan intervention.

Step 4: Analysing learners’ performance to improve the process of learning and teaching
By analysing learner responses, the teacher may choose to repeat certain aspects of the content or use a variety of strategies to improve learning. This can be followed by extended opportunities for learners to improve their learning.

Step 5: Feedback to learners
Feedback from the teacher is essential to improve the learners’ confidence, self-awareness and enthusiasm for learning. It should be done in such a way that it maximises the learners’ potential at different stages of the learning and teaching process.
1.1.2 The THREE functions of a quality assessment programme

- **ASSESSMENT FOR LEARNING** — teachers monitor learners’ progress to inform their teaching
- **ASSESSMENT AS LEARNING** — learners reflect on their progress to inform their future learning
- **ASSESSMENT OF LEARNING** — teachers use evidence of learners’ performance to make judgments on learner achievement against clearly stated standards.

**School-based assessment needs to be continuous and integrated naturally into every stage of the teaching-learning cycle, not just at the end.**

1.1.3 The difference between formative and summative assessment

School-based assessment tasks can be used for **formative** as well as **summative** purposes.

**Summative assessment**
Refer to more formal planned assessments at the end of a unit or term/year which are used primarily to assess learners’ progress.

**Formative assessment**
Is usually more informal and more frequent, involving the gathering of information about learners and their learning needs **while they are still learning**.

Formative assessment has two key functions: **informing** and **forming**. Formative assessment shapes the decisions about what to do next, by helping the teacher to select what to teach in the next lesson, or even in the next moment in the lesson and the learners to understand what they have learnt and what they need to learn next.

- Although conflict is not easy ✓ it is inevitable – you cannot go through life without it. ✓
- Speaking your mind does not mean that you have to be rude or disrespectful ✓ communication is vital for a healthy relationship. ✓
- You have to know what issue you are planning to address and have already thought what you would like to say ✓ but what you would like the solution to be in the outcome of the conversation. ✓
- There doesn’t have to be an argument ✓ two people can differ and have a conversation.
- Approach people with understanding and good intentions ✓ if you start with anger you will end in anger. ✓
- Consider the other person’s state of mind ✓ Is he/she tired, under stress and bear this in mind when communicating. ✓

(2)

3 x 2 (6)

2.4 Discuss THREE ways in which entrepreneurship can help to combat unemployment and improve the economy of South Africa

1. Entrepreneurs create business that hire people ✓
Entrepreneurs provide their employees a job and income. The workers’ income puts food on the table and feed their family members. The same income will be needed to be able to buy necessities such as food, clothing and shelter. This in turn will help spur the economy and provide necessary jobs and businesses for people that meet these basic needs. This will benefit the people working or providing these kind of businesses.

2. **Entrepreneurs pay taxes** ✓
The small businesses that entrepreneurs established are required to pay necessary local, state, and/or the federal government taxes. The tax money from the businesses will be used by the government to provide people with basic services such as health care, transportation, education, construction etc.

3. **Entrepreneurs create demand for products which in turn create jobs and other businesses** ✓
Entrepreneurs need raw material or products to produce finished goods. Buying raw materials for their businesses will create other businesses which in turn more create jobs.

4. **Entrepreneurs introduce new technologies to the market** ✓
They come up with new technologies, create new products and provide new services.

5. **Entrepreneurs stimulate the economy by instilling confidence in people** ✓
The economic health of the nation generally depends on the Gross Domestic Product (GDP) performance. Entrepreneurs, through the jobs and businesses they create, are vital to the GDP equation. Having a healthy economy makes people confident to invest, live and work in that place in times of recession.

Any TWO of the above or any well substantiated answer.

**SEE THE RUBRIC FOR MARKING**

**ACTIVITY 3: CASE STUDY**

3.1.1 Define the term “bail”.  
- the temporary release of an accused person awaiting trial, sometimes on condition that a sum of money is lodged to guarantee their appearance in court.

3.1.2 Give two reasons why these traffic cops could have been denied bail.  
- they are law officers who are expected to uphold the law and have failed to respect the law  
- they are expected to enforce the law, yet they are found to be breaking the law  
- they have made a pledge of honour and honesty to the country and have broken that code  
- there is a need to root out fraud and corruption and an example is set with these officials

3.1.3 Explain why it is problematic if someone is issued with a fraudulent license.  
- It puts your person/integrity in disrepute as you are seen as being corrupt as well.  
- You may be seen as aiding and abating criminality in the country.  
- You may lose out on employment opportunities – especially where a license is required.

3.2 Provide TWO reasons why are people hesitant to report corruption?  
- They may feel they stand to lose the most by speaking up.  
- The fear of being labelled a “sneak” or a troublemaker  
- The fear of “breaking ranks” and appearing disloyal to colleagues  
- The fear of being required to provide irrefutable evidence.  
- To protect others and the interests of their employers that are not participating  
- They feel they will be disadvantaged, disciplined or even dismissed for speaking out.  
- They may feel they will find themselves out of a job or out of a career.  
- They are benefitting indirectly from the fraud/corruption.  
- They don’t feel it will make a difference.  
- They are unaware of who to speak/report it to.

Any TWO relevant answers for ONE mark each.  

3.4 Evaluate the impact / effects of fraud and corruption on the country.  

Gauteng Department of Education  
Life Orientation TG  
Gr 12 - 2017
• If a country is known to be corrupt, foreign investors will NOT want to invest their money in the country. ✓
• It hinders democracy and the rule of law✓
• This means fewer jobs are created and unemployment remains high. ✓
• People’s standard of living remains low and the cycle of poverty continues✓
• Fraud and corruption have an economic impact, e.g. in government bribes can influence who gets a contract, the terms of the contract as well as terms of subcontracts when the project is implemented. ✓
• Cynicism and reducing interest of political participation, political instability, reducing political competition, reducing the transparency of political decision making✓
• Political intolerance, problems of accountability and transparency to the public, low level of democratic culture, principles of consultation and participation dialogue✓
• Corruption leads to the depletion of national wealth. It is often responsible for increased costs of goods and services, the funnelling of scarce public resources to uneconomic high profile projects at the expense of the much needed projects such as schools, hospitals and roads, or the supply of potable water, diversion and misallocation of resources, conversion of public wealth to private and personal property, inflation, imbalanced economic development, weakening work ethics and professionalism, hindrance of the development of fair in market structures and unhealthy competition there by deterring competition. Large scale corruption hurts the economy and impoverishes entire population. ✓
• Corruption discourages people to work together for the common good. Frustation and general apathy among the public result in a weak civil society. Demanding and paying bribes becomes the tradition. It also results in social inequality and widened gap between the rich and poor, civil strife, increased poverty and lack of basic needs like food, water and drugs, jealousy and hatred and insecurity✓
• Causes loss of business reputation✓
• Increases cost of doing business✓
• Undermines innovation since bribes, instead of performance, determine project award✓
• Large-scale corruption, meanwhile, damages the quality of public services on which the poor depend particularly, to meet basic needs.
